

POST FORMED PRODUCTS

Post-forming allows panels to be produced with 'soft' edges. Panel edges can be formed with a variety of curves and radii and wrapped with man made laminates to provide a seam free, smooth and durable surface/edge.

Panels can be manufactured with Mdf (ultra light, moisture resistant and fire retardant) or chipboard (moisture resistant and fire retardant) with a variety of edge details.

Where site access prohibits the delivery of 'one piece' work surfaces/counter tops, Spa can offer an onsite fabrication service. This service can be extended to the repair of panels whilst insitu should they become damaged either during installation or whilst in use.

Applications:

- Counter Tops
- Kitchen Worktops
- Desks
- Lockers
- Vanity Worktops
- Laundry Work Surfaces
- Wall Panelling
- Display Units
- Cubicles
- Lift Claddings
- Shelving
- Reception Units
- Medical/hospital Interiors
- Laboratory Work Surfaces

Finishes:

There are many man made 'post-forming' grade laminates available. We can supply panels manufactured utilising any laminate that is commercially available i.e.:

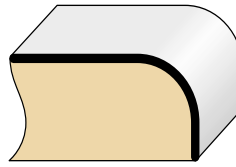

- Polyrey
- Perstop
- Formica
- Decamel
- Thermopal
- Wilsonart
- Abet Laminati

Edge Details:

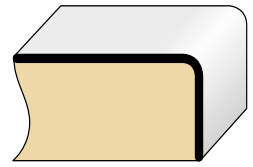

- Single Round (waterfall)
- Pencil Round
- Double Round
- Bullnose
- Multiple curves

Edge Details

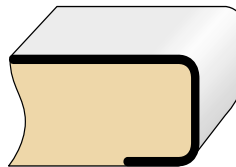

The following are examples of edges that are frequently requested.

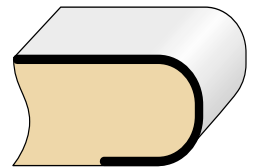

Single Round

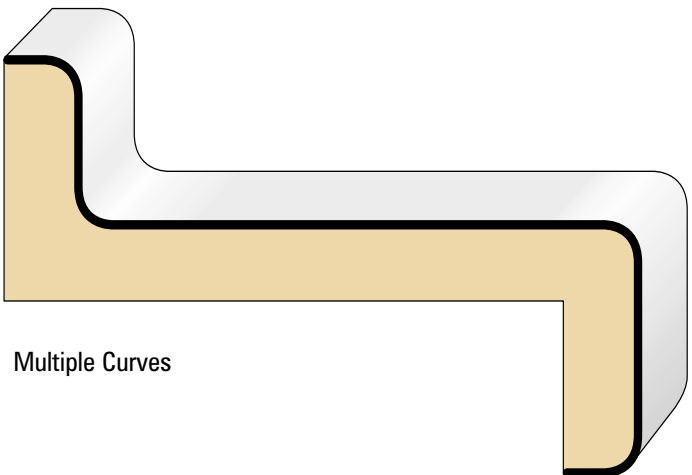

Pencil Round

Double Round

Bullnose

Multiple Curves
